

A NOVELTY  
IN **SILAGE**  
**BALE WRAP**

# *Fiber4Silage*<sup>TM</sup> **PRIME**

**Fiber4Silage<sup>TM</sup> PRIME** is a fiber reinforced multilayer film that creates a **protection grid** around the bale that ensures **tight wrapping** with consistent film stretching. The **superior film strength** due to this unique structure **prevents tearing and breakages** during bale wrapping.

# Fiber4Silage™ PRIME

## APPLICATION:

- Film Stretching (50%-70%)
- 58 - 62cm film width
- Indoor storage (on flat side of the bale) - Dry Place
- Minimum 6 layers
- Wrap bales within 2 hours of baling

## MAIN ADVANTAGES / BENEFITS:

- Superior impact and puncture resistance (up to 20%)
- Enhanced tear resistance
- Excellent layer stickiness
- Protection grid supporting bale tightness
- Optimal oxygen barrier
- Worryless performance in all weather conditions
- Unique design
- Excellent resistance to UV radiation (12 months)

## SUSTAINABILITY & USER FRIENDLINESS:

- Less material used
- Less plastic per bale
- Reduced waste
- Easy bale unwrapping
- Time saving

### Packaging & Technical Specs

Width	Length	Rolls/Box per pallet	Colors
750mm	1500m	40	White/Green
